The Optical Shop	Ground Level - Right	12	Eye Associates of Northern New England

Centennial Trail Dedication

In 1896, W.I. Lincoln Adams purchased land known as Hilltop Farm on the same parcel of land where the new Littleton Regional Hospital facility was built in 2000. Mr. Adams was a direct descendant of the Adams' Presidential family of Boston. He is known for taking the first flashlight picture made in 1865.

Mr. Adams, his wife, Grace Wilson Adams, and their five children spent summers in Littleton, NH.

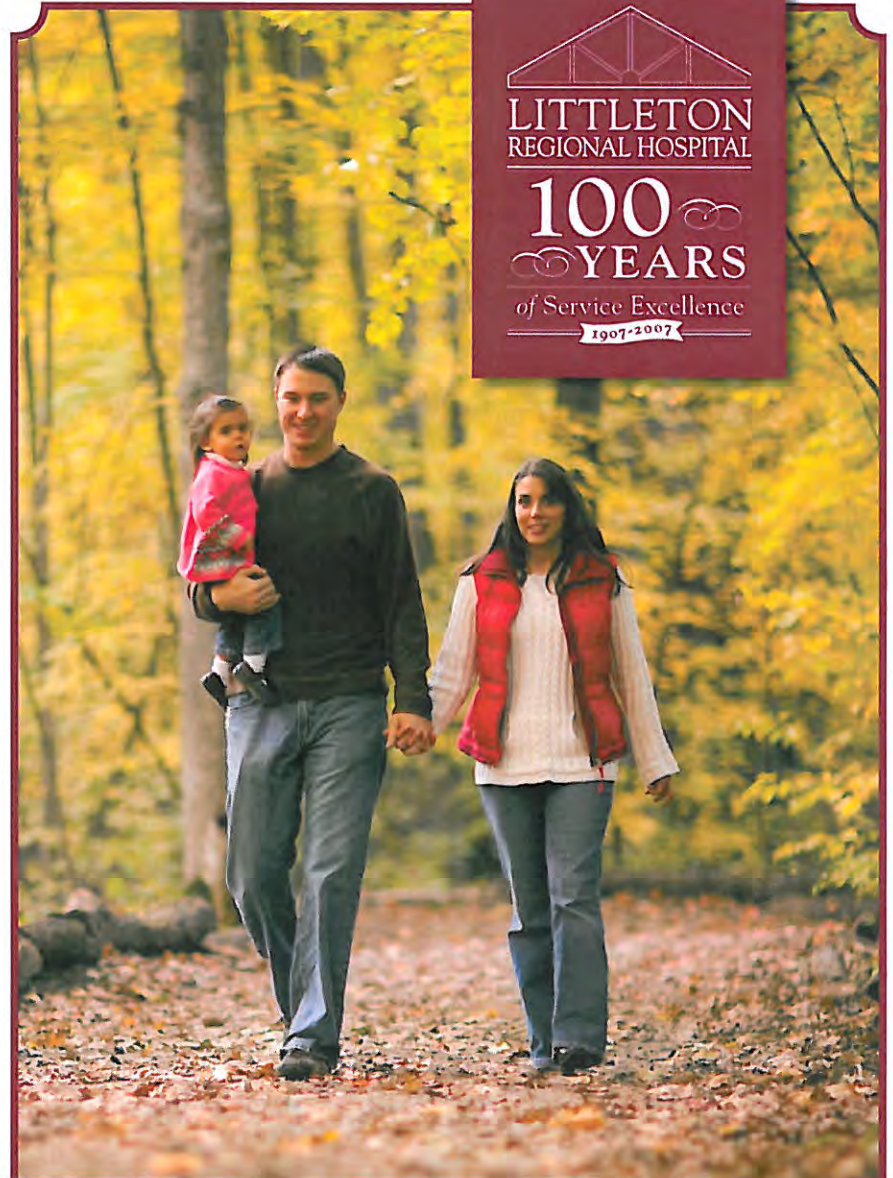

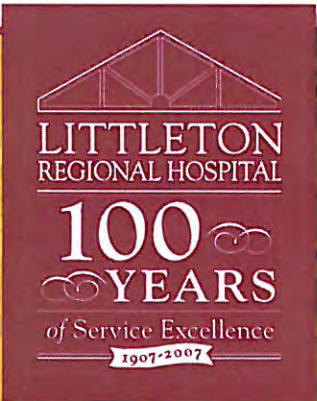

Mr. Adams purchased the estate the year his youngest daughter Carolyn was born. Not one of the five children loved the farm more than Carolyn did or enjoyed life with such intensity. She was a true child of nature possessing an innate appreciation of the beauties of the outdoors. Her tender sympathy with those less fortunate was one of her most notable characteristics. Shortly after her untimely death at the young age of 14, her father found among her belongings the following little poem in her handwriting. There was no mark whereby to tell the authorship. It is assumed to be her own production, and shows the high quality of her thoughts and a child's imagination rich in promise.

"Every night a star high above me
Sends its light clear and bright,
To say I love you.
Sends its light clear and bright,
To say I love you.

In bed I lie but not sleeping.
From afar, calls a star,
My watch I am keeping.
From afar, calls a star,
My watch I am keeping."

It is fitting that Littleton Regional Hospital was built on the very soil where Carolyn lived and loved life.
